ABOUT ME

Technically educated electrical engineering student with strong IT knowledge and practical skills in working with computers. I have experience with Linux operating systems, proficiency in several programming languages (C, C++, GoLang, React, Node.js), and solid knowledge in diagnosing and solving hardware and software issues. Communicative, adaptable, and a good team player with strong motivation for continuous professional development and learning new technologies.

WORK SKILLS AND COMPETENCES

IT Skills:

- Excellent knowledge of computers, components, and peripherals
- Advanced knowledge of Linux operating systems (installation, configuration, terminal, troubleshooting)
- Excellent understanding of the Windows environment
- Good skills in computer and phone servicing (basic diagnostics, reinstallation, configuration, navigation, applications)
- Proficient in using the Office suite (Word, Excel, PowerPoint) and various advanced software tools
- Basic programming knowledge (C, C++, GoLang, React, Next.js, Git, and more)

Sales and Communication Skills:

- Developed communication skills and a professional approach to customers
- Patience when working with users and a strong understanding of their needs
- Ability to provide recommendations and explain technical specifications in a simple and clear way
- High motivation to work in an IT environment and learn new technologies
